DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, drawn to an apparatus or a method for magnetically supporting two structures, classified in many different classes and subclasses. See the examiner's notes below.
- II. Claims 29-31, drawn to a lithography system, classified in class 318, subclass 649.

Examiner's Notes: The first group claims are generic claims claiming an apparatus or a method for magnetically supporting two structures. This type of apparatus can be found in many places, such as in a magnetically bearing, in a plotter, in a vehicle suspension system, in a magnetic supported train, etc. Thus, this group of claims can be found in several different areas of class/subclass.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions supporting apparatus and lithography system are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the magnetically supporting apparatus may not be used with a lithography system, the lithography system can use a ball bearing and screw type of drive whereas the magnetically supporting system can be used with a magnetic bearing. The subcombination has separate utility such as magnetic bearing for supporting a rotor and a stator or a magnetic graph plotter for supporting the platform of the plotter.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
